GUIDED VELOCITY

Technology modernization | Cybersecurity | Workflow improvement

Eastern Provisions LLC | New York limited liability company | Public-facing brand: Guided Velocity

Principal-led technology services for small businesses, municipalities, school districts, and public organizations. We start with the operational need, select a proportionate solution, and prioritize practical delivery, maintainability, and security.

CORE CAPABILITIES

• Cybersecurity and incident preparedness: security readiness reviews, access and identity assessments, incident response playbooks, escalation workflows, tabletop planning, and security documentation.

• Websites and applications: modern websites, web portals, forms, lightweight applications, integrations, and maintainable technical handoffs.

• Workflow modernization: process mapping, automation, scripts, systems integration, operating procedures, and technology adoption.

• Technology architecture and responsible AI: architecture review, tool evaluation, human oversight, governance, and AI adoption where justified by the business need.

EXAMPLE ENGAGEMENT DELIVERABLES

• Incident response plan with roles, escalation matrix, incident categories, and communication procedures.

• Municipal or small-business website with accessible content structure, forms, and documented administration handoff.

• Security readiness findings, prioritized remediation roadmap, and practical operating procedures.

• Workflow map, integration or automation implementation, and staff-facing documentation.

DELIVERY APPROACH

Discover: understand requirements, constraints, stakeholders, and existing systems. Deliver: implement the right-sized solution with clear scope and review checkpoints. Support: provide documentation, handoff, and optional ongoing assistance.

DIFFERENTIATORS

• Direct engagement with the principal responsible for technical direction and delivery.

• Experience spanning military security operations, enterprise incident response, and modern technology architecture.

• Security-conscious approach without forcing unnecessary platforms or AI into the solution.

QUALIFICATIONS & VENDOR PROFILE

The professional roles below describe Daniel Obuck's individual experience, separate from Eastern Provisions LLC's contract history.

PRINCIPAL — DANIEL OBUCK

U.S. Navy veteran and former TS/SCI clearance holder, with professional experience across security operations, incident response, data protection, enterprise architecture, and AI governance. A previously held clearance does not imply current clearance or a cleared company.

SELECTED PROFESSIONAL EXPERIENCE

• Copado — Director of AI and IT Architecture: enterprise AI and IT architecture leadership, technology strategy, and governance.

• Salesforce — Information Security Senior Associate: CSIRT, insider threat, government incident response functions, and secure AI-assisted investigative workflows.

• Own / OwnBackup — Security engineering and analysis: security monitoring, SIEM integration, DLP, vendor risk, incident response, and security tooling.

• Tata Communications / CyberConvoy: information security monitoring, investigations, managed detection and response, SOP development, and client communication.

• U.S. Navy — SOC Watch Officer and Analyst: led a five-person watch team; supported security operations and incident response for a network serving approximately 29,000 users.

TRAINING & CERTIFICATIONS

Certifications: CompTIA Security+, CompTIA Network+, AWS Certified Cloud Practitioner.

Specialized training: Comprehensive Cybersecurity Defense (PER-256), Cybersecurity First Responder training, Splunk Fundamentals, CrowdStrike University coursework, and U.S. Navy technical training.
